

1 **Abstract**

5 A wheel comprising a wheel blank and at least one design
element, wherein the at least one design element is a separate
10 part attached to the wheel blank. The wheel may further
comprise an outer peripheral portion, an inner hub portion and
an intermediate portion bridging the outer peripheral portion
and the inner hub portion. Additionally, the design element
15 may be made from aluminum, may be a different color than the
wheel blank and may have a different finish than the wheel
blank.
